

*** Opportunity ***

It is the mission of ODC to eliminate the difficulties obtaining access to dental care for residents in New England Assisted Living Communities

Professional Development – ODC’s Director of Clinical Operations Dr. Gregory Wu (Tufts 05’) works with each doctor to develop their approach to caring for the exploding elderly population.

Compensation – Competitive % of Production, Daily Per Diem, Fee for Service, PRIVATE PAY, Reliability of patient flow, Flexibility of schedule, CEU program.

State of the Art equipment / and technology – we use the most current mobile dental equipment, Fiber Optics, Ultrasonic Scaler, Digital x-rays, cloud based software.

Quality of Care – Assisted-Living Communities are not Nursing Homes. Our patients are not chronic; they are relatively healthy active seniors. More importantly, we consider it an honor to be able to treat America’s Mom’s and Dad’s. These are the great people that built our country. Every day provides our teams an opportunity to hear a great story from our patients who were born at the end of the depression and grew up during WWII. Our teams live our Mission Statement every day.

➤ To Care – To Respect – To Advocate

Proven Success - We currently have 150 communities in MA, CT, RI providing access to over 15,000 potential patients.
